

COVER LETTER

Dear Hiring Manager,

My name is Mantas Pociuipa, and I am writing to express my interest in the Junior Full-Stack Developer position at your company.

I recently completed a Full-Stack JavaScript Developer program at Kaunas School of Information Technologies (February 2024 – July 2024), where I gained practical experience in building modern web applications using JavaScript, React, Node.js, and REST API architecture. During my training, I developed full-stack projects involving front-end interfaces, backend logic, and database integration.

My academic background includes a Bachelor's degree in Public Health, which strengthened my analytical thinking, structured problem-solving abilities, and attention to detail. In 2024, I made a deliberate career transition into the IT field, dedicating myself fully to professional retraining and technical development.

Through my GitHub portfolio (github.com/mpociuipa), I demonstrate practical coding skills, understanding of modern development workflows, and the ability to learn independently. I am highly motivated to begin my professional software development career in an international environment where I can contribute, grow, and continuously improve my technical expertise.

Thank you for considering my application. I would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,
Mantas Pociuipa

PROFESSIONAL SUMMARY

Motivated Junior Full-Stack Developer with hands-on training in JavaScript development and modern web technologies. Strong foundation in React and Node.js, with practical experience building REST APIs and working with databases. Analytical thinker with a background in Public Health, bringing structured problem-solving skills and continuous self-learning mindset. Seeking an entry-level developer position abroad.

TECHNICAL SKILLS

- Programming: JavaScript, TypeScript, HTML, CSS, SQL (basic)
- Frontend: React
- Backend: Node.js, REST API development
- Databases: MySQL (basic knowledge)
- Tools: Git, GitHub
- Other: Analytical thinking, problem-solving, self-directed learning

PROJECTS

- **Full-Stack Web Application (Course Project)**
Developed a full-stack web application using React and Node.js. Implemented RESTful API endpoints and integrated relational database storage.
- **JavaScript Applications**
Built interactive front-end components demonstrating DOM manipulation, asynchronous programming, and API integration.
